

Insurance Payouts are more reliable than Humanitarian Assistance

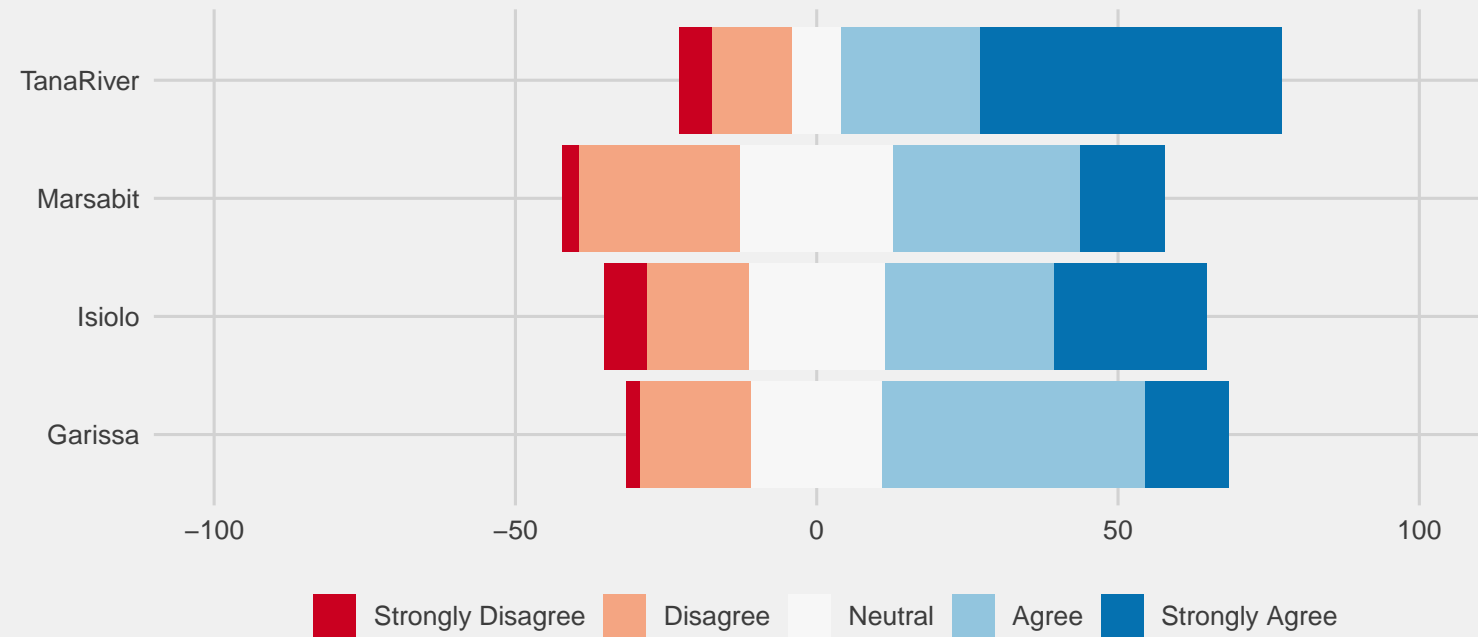

With KLIP you can be certain that they will issue Payout when there is severe drought

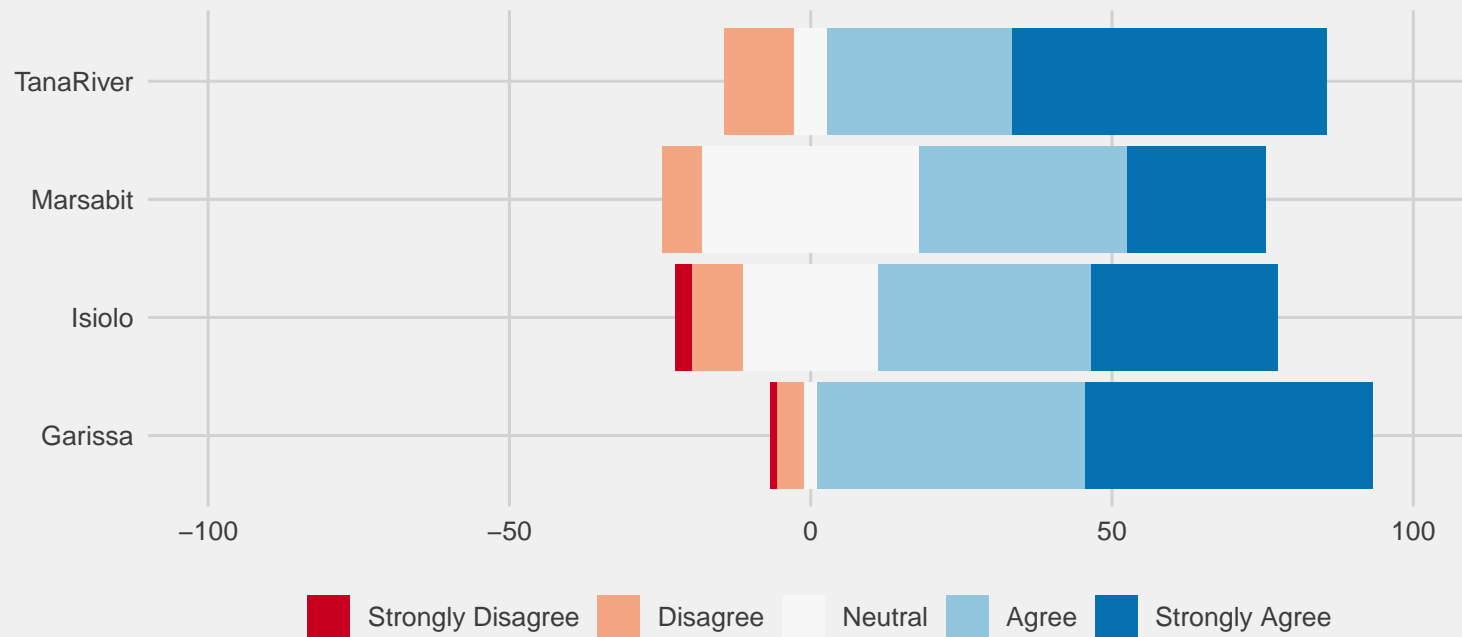

I prefer the HNRP over KLIP because they give more assistance

The KLIP payout is always sufficient to help us with our livestock during the seasons of drought

I would prefer KLIP to humanitarian aid (msaada) issued by Government of other Agencies

With the HNRP I know in advance if I will receive assistance or not
